Compact RFI Filter with IEC Connectors

**UL Recognized

VDE, SEV†, SEMKO*, and BSI* Approved**

EF Series

This rugged international series of RFI filters incorporates the special IEC power line connector. They are UL recognized, CSA certified, and VDE and SEV approved. Models with F suffix are SEMKO approved and comply with BSI standards.

Electrically the EF international series are general purpose filters effectively providing RFI control of line-to-ground noise. The design is compact and meets the very low leakage current requirements of SEV and VDE portable equipment as well as (120 Volt) UL544 nonpatient medical equipment. Models with F suffix have .250" terminals on load side; EF4 and EF8 have wire leads.

Model 10EF1FC additionally incorporates a separate ground-circuit inductor to isolate the equipment chassis from power line ground at RF frequencies.
