

Features:

- High stability tantalum nitride film
- Available in 0402, 0603, 0805 and 1206
- TCR to $\pm 10\text{ppm}/^\circ\text{C}$
- Sulfur resistant to ASTM B809-95
- Both Pb-free and SnPb finish available
- AEC-Q200 qualified

All Pb-free parts comply with EU Directive 2011/65/EU amended by (EU) 2015/863 (RoHS3)

Construction

Conductors and tantalum nitride resistive element are applied to an alumina substrate. The product is laser trimmed to value, and a protective epoxy coat is applied. The product is then metallized and plated to provide a wrap-around solderable termination with a 100% matte tin or a 60/40 SnPb finish on a nickel barrier layer. It is 100% tested then packed in carrier tape. Pb-free parts use paper carrier tape, whilst SnPb parts use plastic carrier tape.
