Overview

Specs

Documentation

Description

The 3455RCG Series consists of a temperature-sensitive bimetal disc, electrically isolated from the switch, which actuates the normally closed contacts. The contacts open when the surface or ambient temperatures increase to the operating snap point of the calibrated disc. Response to temperature changes is extremely rapid due to the inherently low mass of the disc and the small size of the product. It has gold alloy contacts for low voltage applications.

Cost effective switching solution Rivet sleeve construction High profile High temp capability Logic level contacts

Features

- Cost effective
- Rivet sleeve construction
- High profile
- High temperature capability
- Logic level contacts

Potential Applications

- HVAC
- Power supplies
- Spas
- Office automation
