Passive isolator, 2-channel; Current input signal; 2 x current output signal; Power via input; 6 mm module width; 2,50 mm²

<https://www.wago.com/857-452>

Short description:

WAGO's passive isolator (2-channel) electrically isolates and filters 0(4) ... 20 mA standard analog signals, while drawing power for signal transmission from the input circuit. The connected sensor supplies the passive isolator with the required power to energize the connected load.

Features:

- No additional supply voltage required
- 3-way electrical isolation with 2.5 kV test voltage

Notes	
Safety Information	Outputs must not be left open!
Note	Use shielded signal cables! Only use shielded signal cables for analog input and output signals. This ensures the device maintains its specified accuracy and immunity to interference, even when external disturbances affect the signal cable.

Installation Notes

Commoning

Commoning, not discrete wiring – Same
outline allows use of a single in-line, push-
in jumper.
